Aims and Scope *The Journal of Evolutionary Biology* is a peer-reviewed, international journal owned by the European Society of Evolutionary Biology. We consider submissions describing research from across the field of evolutionary biology, such as molecular evolution, evolutionary genetics and genomics, life histories, evolutionary ecology, development or morphology. We cover both micro- and macro-evolution, as well as empirical, computational and theoretical work. We prioritise articles that make significant advances from a broad conceptual and taxonomic perspective. The Editorial Board reflects the journal's multidisciplinary remit and its international reach.

Disclaimer The Publisher, European Society for Evolutionary Biology and Editors cannot be held responsible for errors or any consequences arising from the use of information contained in this journal; the views and opinions expressed do not necessarily reflect those of the Publisher, European Society for Evolutionary Biology or Editors, neither does the publication of advertisements constitute any endorsement by the Publisher, European Society for Evolutionary Biology or Editors of the products advertised.

Copyright and Photocopying Copyright © 2023 European Society for Evolutionary Biology. All rights reserved. No part of this publication may be reproduced, stored or transmitted in any form or by any means without the prior permission in writing from the copyright holder. Authorization to copy items for internal and personal use is granted by the copyright holder for libraries and other users registered with their local Reproduction Rights Organisation (RRO), e.g. Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923, USA (www.copyright.com), provided the appropriate fee is paid directly to the RRO. This consent does not extend to other kinds of copying such as copying for general distribution, for advertising or promotional purposes, for creating new collective works or for resale. Permissions for such reuse can be obtained using the RightsLink "Request Permissions" link on Wiley Online Library. Special requests should be addressed to: permissions@wiley.com

Online Open *Journal of Evolutionary Biology* accepts articles for Open Access publication. Please visit <http://olabout.wiley.com/WileyCDA/Section/id-828081.html> for further information about OnlineOpen.

Information for Subscribers The *Journal of Evolutionary Biology* is published in 12 issues per year. Institutional subscription prices for 2023 are: Online Only: £2,287 (UK), US\$4257 (US), US\$4257 (Rest of World), €2,904 (Europe). Prices are exclusive of tax. Asia-Pacific GST, Canadian GST/HST and European VAT will be applied at the appropriate rates. For more information on current tax rates, please go to <https://onlinelibrary.wiley.com/library-info/products/price-lists/payment>. The institutional price includes online access to the current and all online backfiles for previous 5 years, where available. For other pricing options, including access information and terms and conditions, please visit <https://onlinelibrary.wiley.com/library-info/products/price-lists>.

Terms of use can be found here: <https://onlinelibrary.wiley.com/terms-and-conditions>

Note to NIH Grantees Pursuant to NIH mandate, Wiley Blackwell will post the accepted version of contributions authored by NIH grant-holders to PubMed Central upon acceptance. This accepted version will be made publicly available 12 months after publication. For further information, see www.wiley.com/go/nihamandate.

Delivery Terms and Legal Title Where the subscription price includes print issues and delivery is to the recipient's address, delivery

terms are Delivered at Place (DAP); the recipient is responsible for paying any import duty or taxes. Title to all issues transfers FOB our shipping point, freight prepaid. We will endeavour to fulfil claims for missing or damaged copies within six months of publication, within our reasonable discretion and subject to availability.

Back Issues Single issues from current and recent volumes are available at the current single issue price from cs-journals@wiley.com. Earlier issues may be obtained from Periodicals Service Company, 351 Fairview Avenue – Ste 300, Hudson, NY 12534, USA. Tel: +1 518 822-9300, Fax: +1 518 822-9305, Email: psc@periodicals.com

Periodical ID Statement *JOURNAL OF EVOLUTIONARY BIOLOGY* (ISSN 1420-9101) is published monthly.

Publisher *Journal of Evolutionary Biology* is published by John Wiley & Sons Ltd., 9600 Garsington Road, Oxford OX4 2DQ, UK. Tel: +44 1865 776868, Fax: +44 1865 714591, Email: customer@wiley.com.

Journal Customer Services For ordering information, claims and any enquiry concerning your journal subscription please go to <https://hub.wiley.com/community/support/onlinelibrary> or contact your nearest office:

View this journal online at wileyonlinelibrary.com/journal/jeb.

Wiley is a founding member of the UN-backed HINARI, AGORA, and OARE initiatives. They are now collectively known as Research4Life, making online scientific content available free or at nominal cost to researchers in developing countries. Please visit Wiley's Content Access – Corporate Citizenship site: <http://www.wiley.com/WileyCDA/Section/id-390082.html>

Abstracting and Indexing Services The Journal is indexed by Animal Behaviour Abstracts, Biological Abstracts, BIOSIS, CAB International, CABS (Current Awareness in Biological Sciences), Cambridge Scientific Abstracts, Chemical Abstracts, Current Contents, Entomology Abstracts, Geo Abstract and Scopus. The full list is published on the journal home pages.

Wiley's Corporate Citizenship initiative seeks to address the environmental, social, economic, and ethical challenges faced in our business and which are important to our diverse stakeholder groups. Since launching the initiative, we have focused on sharing our content with those in need, enhancing community philanthropy, reducing our carbon impact, creating global guidelines and best practices for paper use, establishing a vendor code of ethics, and engaging our colleagues and other stakeholders in our efforts. Follow our progress at www.wiley.com/go/citizenship

For submission instructions, subscription and all other information visit: <http://www.journalofevolutionarybiology.org>

An EndNote style file is available from <http://authorservices.wiley.com/jendnotes/>. We have endeavoured to make this style file as comprehensive as possible, but complex or unusual reference types and variations in reference data quality in EndNote may result in missing information or formatting problems. If you have any comments or suggestions for improvement, please contact the journal Production Editor at: jeb@wiley.com

Specifications

Tables Tables should be cited consecutively in the text and labelled (Table 1, Table 2, etc.). Each table should be titled and typed double-spaced on a separate page. Units must be clearly indicated for each of the entries in the table. Footnotes to tables should be identified by the symbols *, †, ‡, §, ¶ (in that order) and placed at the bottom of the table. No vertical rules should be used. Tables should be prepared in portrait orientation wherever possible.

Figures Figures should be cited consecutively in the text (e.g. Fig. 1, Fig. 2, etc.) and should be grouped together at the end of the paper or in a separate file(s). Legends should be grouped at the end of the paper. Line figures and combination figures should preferably be submitted in vector graphics format (e.g. PDF or EPS format, or embedded as vector graphics in a Word or PowerPoint document). If this is not possible, they should be saved separately as pixel-based graphics at 600 d.p.i. at the required print size, and they should be created and saved in tif (not jpg) format. Note that vector graphics are the preferred format for line and combination figures because figure quality can then be maximized in the online PDF publication. Photographic figures (photos) should be saved at 300 d.p.i. in jpg or tif format. Figures should be created at their smallest practicable size to fit either a single column (max. width 80 mm), two-thirds page width (max. width 110 mm), or a double column (max. width 166 mm). Over-sized figures will be reduced for publication. If figures are created larger than intended publication size, component parts such as symbols and text must be large enough to allow for the necessary reduction. For full instructions on preparing your figures, see <http://authorservices.wiley.com/bauthor/illustration.asp>.

Scientific names Provide the Latin names of each species in full, together with the authority for its name, at first mention in the main text. If there are many species, cite a flora or checklist that may be consulted for authorities instead of listing them in the text. Do not give authorities for species cited from published references. Give priority to scientific names in the text (with colloquial names in parentheses if desired).

Units and symbols Authors are requested to use the International System of Units (SI, *Système International d'Unités*) where possible for all measurements (see *Quantities, Units and Symbols*, 2nd edn., 1975, The Royal Society, London). Note that mathematical expressions should contain symbols not abbreviations. If the paper contains many symbols, it is recommended that they should be defined as early in the text as possible, or within a subsection of the Materials and Methods section.

Supporting Information Supporting Information can be published online at the Editors' discretion. This may include information on, for example, sampling locations, data underlying analyses or figures, additional analyses not presented in the manuscript, or relevant multimedia files (e.g. mating song audio clips). Supporting Information must be formatted and supplied by the author in a ready-to-publish form (wide line spacing and line numbering is therefore not required). Please label Supporting Information S1, S2, S3, etc., for example Appendix S1, Appendix S2, Figure S1, Movie S1. Please compose the Supporting Information section at the end of your article using shortened titles of the Supporting Information if the full titles are long (more than a short sentence). Full titles should be supplied with the Supporting Information itself and will be published online. Further guidelines for authors are available at: <http://authorservices.wiley.com/bauthor/supinfo.asp>.

Statistical results In-line statistical results should be presented with the test statistic followed by degrees of freedom as subscript(s) to the test-statistic (e.g. $F_{1,12} = 1.74$, $P \leq 0.001$). Depending on the details of the analyses, results reported may include parameter estimates, test-statistics, degrees of freedom, significance levels and error/residual model information (e.g. error MS and d.f. in ANOVA or regression models). Since exact P-values can be useful for meta-analyses, we ask that these are quoted even when non-significant, e.g. $t_{23} = 0.25$, $P = 0.34$. However, non-significant tests (i.e. $P > 0.05$) should always be interpreted as such.

Cover image

Authors who have their paper accepted for publication are encouraged to submit a photograph(s) illustrating their work (please do not submit photographs until your paper has been accepted). These should be of publishable quality, both in terms of content and image quality. They should be approximately 300 d.p.i. when sized to 15 cm height (max.) by 21.2 cm width (fixed), and if saved in jpg format a low compression setting should be used. Please crop image to these stated dimensions if possible. Resolutions below about 200 d.p.i. will generally not be of high enough quality for publication. You can email your images to the journal Production Editor at jeb@wiley.com with a brief caption (20 to 40 words). This should include a photo credit. If photographs are not the author's, permission for use must have been obtained prior to submission. The photographer of any cover image published will be required to sign a release form.

Colour figures

Colour photographs or other figures are reproduced online free of charge. Authors are encouraged to make good use of colour wherever possible.

Proofs

Authors will be sent an e-mail alerting them that their PDF proof is available for download. Instructions on annotating the proof using Acrobat's PDF annotation tools and uploading corrections to the Wiley Online Proofing server will be included. Authors should complete their proof review within 48 hours of receipt.

Offprints

Free access to the final PDF offprint or your article will be available via Author Services only. Please therefore sign up for Author Services when your paper is accepted if you would like to access your article PDF offprint and enjoy the many other benefits that Author Service offers (see above). Paper offprints may also be purchased and should be ordered when you return your proof corrections by following the instructions supplied at the time.

Early View

The *Journal of Evolutionary Biology* is covered by Wiley Blackwell's Early View service. Early View articles are complete full-text articles published online in advance of the publication in an online or printed issue. Articles are therefore available as soon as they are ready, rather than having to wait for the next scheduled issue. Early View articles are complete and final. They have been fully reviewed, revised and edited for publication, and the authors' final corrections have been incorporated. Because they are in final form, no changes can be made after online publication. The nature of Early View articles means that they do not yet have volume, issue or page numbers, so Early View articles cannot be cited in the traditional way. They are therefore given a Digital Object Identifier (DOI), which allows the article to be cited and tracked before it is allocated to an issue. After print publication, the DOI remains valid and can continue to be used to cite and access the article.

Copyright Transfer Agreement

If your paper is accepted, the author identified as the formal corresponding author for the paper will receive an email prompting them to login into Author Services; where via the Wiley Author Licensing Service (WALS) they will be able to complete the license agreement on behalf of all authors on the paper. If the OnlineOpen option is not selected the corresponding author will be presented with the copyright transfer agreement (CTA) to sign.

Online Open

OnlineOpen is available to authors of primary research articles who wish to make their article available to non-subscribers upon publication, or whose funding agency requires grantees to archive the final version of their article. With OnlineOpen the author, the author's funding agency, or the author's institution pays a fee to ensure that the article is made available to non-subscribers upon publication via Wiley Online Library, as well as deposited in the funding agency's preferred archive. The charge for OnlineOpen publication is \$3,000 (discounted to \$1,500 for papers where the first or corresponding author is a current member of the European Society for Evolutionary Biology, www.esb.org). For the full list of terms and conditions, see http://wileyonlinelibrary.com/onlineopen/onlineopen_Terms.

Any authors wishing to publish their paper Online Open will be required to complete the payment form available on our website at: https://authorservices.wiley.com/bauthor/onlineopen_order.asp. Prior to acceptance there is no requirement to inform an Editorial Office that you intend to publish your paper Online Open if you do not wish to. All Online Open articles are treated in the same way as any other article. They go through the journal's standard peer-review process and will be accepted or rejected based on their own merit.

Free access in the Developing World

Free online access to this journal is available within institutions in the developing world through the HINARI initiative with the World Health Organization (WHO), the AGORA initiative with the Food and Agriculture Organization of the United Nations (FAO) and the OARE Initiative (Online Access to Research in the Environment) with the United Nations Environment Programme (UNEP).

Data Availability

JEB requires that, at the point of publication of an article, all raw data supporting the results are archived in an appropriate public repository such as GenBank, Dryad, TreeBASE etc. At the point of manuscript revisions, authors are required to provide a "Data Availability Statement" including a link to the repository they have used. The Data Availability Statement will appear in the final accepted article. Wherever possible the scripts and other artefacts used to generate the analyses presented in the paper should also be publicly archived. Please see our guide to reproducible archiving of data and code on the JEB blog.

Note that JEB holds a subscription to Dryad such that authors of accepted manuscripts can deposit their associated data in this repository at zero cost.

Temporary embargoes or exceptions to depositing data may be granted in exceptional circumstances at the discretion of the Editor-in-Chief, for example if sharing data compromises the location of protected species, privacy of human data, ethical standards, or legal requirements.

JOURNAL OF Evolutionary Biology

VOLUME 36 ISSUE 8 AUGUST 2023

CONTENTS

RESEARCH ARTICLES

- 1077 Sexual signal evolution and patterns of assortative mating across an intraspecific contact zone
Florine J. M. Pascal, Andrés Vega, Maria Akopyan, Kim L. Hoke, and Jeanne M. Robertson
- 1090 Evolution of territoriality in Hylinae treefrogs: Ecological and morphological correlates and lineage diversification
Ricardo Luría-Manzano, Paulo D. P. Pinheiro, Tiana Kohlsdorf, Célio F. B. Haddad, and Marcio Martins
- 1102 Social group composition modulates the role of last male sperm precedence in post-copulatory sexual selection
Juliano Morimoto, Grant C. McDonald, and Stuart Wigby
- 1116 Plasticity and genetic effects contribute to different axes of neural divergence in a community of mimetic *Heliconius* butterflies
Laura Hebberecht, J. Benito Wainwright, Charlotte Thompson, Simon Kershenbaum, W. Owen McMillan, and Stephen H. Montgomery
- 1133 Introgression between highly divergent fungal sister species
Vilde Bruhn Kinneberg, Dabao Sun Lü, David Peris, Mark Ravinet, and Inger Skrede
- 1150 Evolution of posture in amniotes—Diving into the trabecular architecture of the femoral head
Jordan Gônet, Michel Laurin, and John R. Hutchinson
- 1166 Environmentally independent selection for hybrids between divergent freshwater stickleback lineages in semi-natural ponds
Cameron Marshall Hudson, Maria Cuenca Cambrero, Marvin Moosmann, Anita Narwani, Piet Spaak, Ole Seehausen, and Blake Matthews
- 1185 Isotopic niches do not follow the expectations of niche conservatism in the bird genus *Cinclodes*
Jonathan A. Rader, and Daniel R. Matute
- 1198 Female reproductive fluid concentrations affect sperm performance of alternative male phenotypes in an external fertilizer
Pinzoni Livia, Locatello Lisa, Gasparini Clelia, and Rasotto Maria Berica

Cover legend:

Atlantic killifish (*Fundulus heteroclitus*), an important model species for studying eco-evolutionary dynamics.
